Education

Indian Institute of Information Technology, Senapati, Manipur
B.Tech in Computer Science and Engineering (AI & Data Science)
CGPA : 7.35

Sept 2023 – May 2027

Experience

Bluestock Fintech

SDE Intern

June – July 2025

- Developed and deployed a **production-level IPO Web Application** using **Django REST Framework** and **PostgreSQL**.
- Built **dynamic REST APIs** along with demo-level **admin controls**.
- Applied **clean architecture principles** to ensure scalability, maintainability, and modular backend design.
- Collaborated with a **remote team** in an agile environment, strengthening teamwork and code quality practices.

Projects

Daily Notes Tracker

[GitHub](#) | [Live](#)

- Developed a full-stack daily notes tracking web application using a **monorepo** architecture.
- Built the frontend with **React** and **Tailwind CSS**, and the backend using **Node.js**, **Express**, **Prisma ORM**, and **PostgreSQL**.
- Implemented secure **OAuth authentication** for user access and session management.
- Containerized the application using **Docker**, orchestrating **frontend**, **backend**, and a local **PostgreSQL** database.
- Iteratively enhanced the application across **four versions** based on feature discussions and feedback from the LinkedIn developer community.
- Deployed the application on **AWS EC2**.
- Key Features:** Subject wise Notes organisation , Progress Tracking , Sharing Notes card(with built-in expiration time(3day) , Download Notes , update , Delete Saved Notes , Black-White BG toggler

Password Manager

[GitHub](#) | [Live](#)

- Built a secure **Password Management System** enabling users to safely store and access all their credentials in one place.
- Using **React + Tailwind CSS** for frontend, and **Node.js + Express with Prisma-ORM PostgreSQL**.
- Implemented **bcrypt**-hashing before storing the password , and random salt-rounds.
- Integrated **oAuth authentication** for for easy signin-signup and more secure.

AI Chatbot

[GitHub](#) | [Live](#)

- Built an AI-powered chatbot with **JWT-based authentication** to securely control access to LLM APIs.
- Implemented a secure login flow where a signed **JWT** is issued on authentication and validated via middleware before processing requests.
- Designed middleware to **reject unauthorized or invalid token requests**, preventing misuse of LLM API endpoints.
- Ensured secure session handling and request validation to protect backend services and API usage.

Real Time Currency Converter

[sujeet-iiitm](#)

- Built a real-time currency converter using third-party API integration.
- Learnt and implemented API handling, React hooks, Tailwind CSS, and lottie-react animations.

Technologies

TechStacks: Typescript, Nodejs, Reactjs, Nextjs, WebSockets , PostgreSQL, TailwindCSS, ExpressJs, JSON , ORM-(Prisma)

Tools: Turborepo/Monorepo , Arch- Linux , AWS EC-2 , S3 , AWS EC-2 , CloudFront , S-3 , Docker
